

Call for Agri-PV demo drivers

Are you interested in sharing your experience in agri-PV?

Do you have projects that have involved several stakeholders?

Do you have a best practice to promote?

We are eager to learn from existing experience, innovate in our demos and transfer the knowledge to others.

How to apply

It is very simple. Just send an email to info@symbiosyst.eu with a few photos of your project and a short description about what you can share and what you would like to get back from SYMBIOSYST.

Deadline: 17th of November

Decision process

At least 10 projects will be selected to enter in the pool of our demo drivers. Results will be communicated **by December 2023**.

What can we offer

Visibility in events where SYMBIOSYST will be presented. An exciting discussion forum European Cross Cooperation for agri-PV development

What is Symbiosyst

SYMBIOSYST is an EU funded project for the development of novel agri-PV systems. In SYMBIOSYST we will innovate by adapting standardized cost-effective solutions in terms of PV modules, mounting structures and Operation and Maintenance (O&M) practices to the specific needs of various crops in different climates and landscapes. We will find aesthetically pleasing solutions that can be mass manufactured and integrated with the agricultural land in a harmonious way while maintaining the primary goal of farming. We will aim at obtaining a 2-way optimization where the agri-PV systems can be adapted to climate and crops, but also the culture underneath and the culture method can be adapted to fully benefit from the presence of the PV system.
